## TEXAS RANGERS MASSSED ON BORDER

### FEELING CONTINUES HIGH OVER LYNCHING A MEXICAN

### AMERICANS KEEPING UNDER COVER

**Consul Flees to Eagle Pass—Texas Authorities Asked for Protection—Acting Governor in Mexico Tries to Stop The Violence—Troops Held in Readiness to Act At Once.**

By Wire to The Reflector.

Eagle Pass, Texas, Nov. 12.—All Texas rangers who could be spared from patrol duties were massed at strategic points along the Mexican border today. Consel Lutzer Ellworth fled to Eagle Pass from the consulate in Ciudad across the Rio Grande from here. A Mexican commission has asked the Texas authorities for protection while investigating the lynching of Antonio Roderiguez. The commission is now on its way to the scene of the lynching at Rock Springs.

### Acting Governor Issues Proclamation

Mexico City, Nov. 12.—Although acting Governor Gallardo has issued a proclamation counselling the people to refrain from violence and threatening penalties to those inciting violence. Americans in this city were compelled to keep under cover today, so menacing was the situation. Troops were held in the barracks about the city in instant readiness, and police were instructed to dispose of all gatherings. The acting governor declared today that normal conditions would soon prevail although fears were expressed that it might be some time before the anti-American feeling died out entirely.

### THE SAVANNAH RACE.

### Leader Runs Into Tree and Smashes Machine.

Savannah, Ga. Nov. 12.—A big crowd is watching the Savannah grand prize race which started this morning at 9 o'clock. The race is over a 415 mile course. Hampt was leading at end of twelfth lap with half of the race complete. Mazharo was second, Wagner third. When Hampt was four minutes in lead in the thirteenth lap he lost control of his machine and crashed into a tree running 55 miles an hour. His machine was shattered. Hampt was not much injured, but his mechanism was badly hurt and rushed to a hospital. Fifteen cars started, but four were out of the race at the end of the fourteenth lap.

### STRIKE NO NEARER SETTLED.

### Jersey City Express Drivers Refuse to Accept Agreement.

By Wire to The Reflector.  
New York, Nov. 12.—The refusal of Jersey City express drivers to accept the terms of settlement of the strike agreed upon by their leaders and the express companies, left the peace efforts in a chaotic condition today. The New York express men's strike rests in the hands of the drivers and helpers of Jersey City. The latter are still holding out for a "closed shop". The strike stands practically where it did yesterday.

### GREAT TIME IN RALEIGH.

### News and Observer's Aviation Meet Nov. 16-17.

On Wednesday and Thursday, 16th and 17th, the great aviation meet under the auspices of the News and Observer will take place in Raleigh. It is going to be interesting and worth going a long way to see. The railroad will sell round trip tickets at low rates. Don't miss seeing the bird man fly.

### Second Crop Apple.

Today Mr. W. H. Elks, of Chicod township, brought The Reflector an apple of the second crop grown on the same tree this year. He said several trees in his orchard are now in bloom for the third time this year. This is a wonderful climate.

### How Reading Pays.

By reading what other men have done, and are doing, I believe that any thoughtful man can add at least \$500 a year to his income more than he could without the reading. The discoveries of scientists that are helpful to the farmer can only be learned by reading about what they have done, and how their discoveries can be applied in practice the farm press tells us. And yet, there are thousands struggling with poor land, and not knowing how to better it, who will not read and learn. The great problem with those who would help these men is how to get at them and induce them to learn. I sometimes think that the only way we will ever get a reading farm population is to raise it through the rural schools and the colleges of agriculture working together and thus to finally replace the non-reading people—W. F. Massey, in Raleigh Progressive Farmer and Gazette.

### Elects Officers.

At the annual business session of the Christian church last night the following officers were elected to serve from the year ending Nov. 1, 1911. Elders: E. A. Moye, Sr., J. G. Latham, A. J. Outerbridge; Deacons E. L. Daughtridge, J. S. Turnstall, W. J. Turnage, H. B. Harriss, J. A. Bland.

The annual report on church finance was read, also Bible school report. The meeting was an enthusiastic one which bodes well for the future of the church.

**Methodist**—The Sunday school, with the Baraca and Philathea classes meet at 9.30. A full attendance is urgently requested. The union revival services will begin at 11 a. m. Dr. Black will preach morning and evening. All the people of Greenville are cordially invited to attend these services. Every member of the chorus from the different churches is requested to be present and on time.

### STUPID LUXURY.

### David Graham Phillips Blames American Wives.

In this money-madness that results in stupid luxury, our women lead our men, says David Graham Phillips in the Delineator. The American man has not time to reflect. As soon as he is old enough he plunges, or is plunged, into the great scramble for wealth. He does not pause to ask whether the scramble is worth while. He sees all the other men scrambling. He has energy; he wants to do something. He sees nothing else offering. Once engaged, once heated and excited, he keeps on, keeps on. It is not natural that he should? But how about the American woman?

We hear much of the superiority of this lady. And, to be sure, she does look superior. She has nothing else to do. The American man—I am speaking now as throughout this article, only of the well-to-do class—the American man gives her all her time, leaves her free to use it as she pleases. He gives her a luxurious home; he gives her a servant or servants; he gives her credit at the finery shops. He leaves her alone all day, and is usually so tired that he would be glad if she left him alone all evening. Plenty of time to reflect, hasn't she? Well! And what is the net result of this reflecting?

The other evening a woman, wife of a rich banker, said, "this afternoon I couldn't think of a thing to do, so I just took a hot bath." Three women—the wife of an eminent doctor, the wives of two eminent lawyers—lifted themselves heavily out of an automobile, and waddled up to the door of an art gallery, only to find that it was closed. They stared blankly at each other, "What shall we do?" said one despairingly—this in a world where millions on millions of men, women and children have to toil twelve, fourteen, sixteen hours a day, just for poor bread, rags and a hovel! "We might go to a continuous performance till lunch time," said the doctor's wife. "No," said the third woman, "let's go look at those blouses." And off they went to harass the clerks of the blouse department of some shop.

Plenty of time to reflect—all day long, uninterrupted, if they choose. And the result is bridge—and yet more bridge—and showy, ill-fitting, ill-selected dresses and hats; and bodies overlaid with carriage fat and automobile fat and street-car fat and theatre-seat or home-chair fat; and skins disordered from lounging and eating candy; and showy, ill-kept, tasteless houses or flats; and many dollars spent for every dollar in value—even in doubtful value—acquired.

**Mr. Will and Percy Donnell, Near Greensboro, Found Famished Horse Tied to a Tree in Woods—Miss Mary Bridgers, Daughter of Former President of A. C. L., Dead in Wilmington.**

While hunting in the woods a mile southeast of the fair grounds Wednesday afternoon Will and Percy Donnell discovered a horse tied to a pine tree famished and barely alive. They went to a distant farmhouse to get help and food for the animal and upon returning found that he was dead. The horse from the conditions about him, had apparently been tied four or five days.—Greensboro News.

Wilmington, N. C., Nov. 10.—Miss Mary Bridgers, aged thirty-eight and leader of the Christian Science sect here died today of typhoid fever. The fact that no physician was called in to attend her caused intense indignation among her friends outside of the Christian Science church. Miss Bridgers was one of the wealthiest women in Wilmington and was a daughter of a former president of the Atlantic Coast Line railroad company.

Chairman A. H. Eller, of the State Democratic committee, closed his office in Raleigh yesterday afternoon and went to his home in Winston to take a good rest. He deserves it, for in the language of the street he has been on the job day and night. His work was fine. He was ably assisted by Mr. R. F. Beasley, who had charge of the literary bureau. He sent out documents that counted; not the stereotyped stuff, but original matter that hit the spot.—Greensboro Record.

### A Few Pertinent Figures.

The season when bad roads are at their worst is approaching and the readers some recent figures presented on the subject by the Richmond Times-Dispatch very timely. "The cost of hauling farm products in the United States," says The Times Dispatch, "averages about 23 cents a mile, while in Europe where the roads are uniformly good the cost is only 8 cents a mile. If the cost in the United States was only 8 cents a mile the saving would be about \$250,000,000 a year. To transport wheat from New York to Liverpool costs 3.8 cents a bushel. It costs the farmer 5.4 cents a bushel to haul the same wheat from the farm to the market, the average haul being a little less than ten miles. It is estimated that the agricultural products of the United States during the last eleven years have been worth \$70,000,000,000. The cost of moving this produce from the farms to the markets over bad roads above what the cost of transportation would have been over good roads would build approximately a million miles of good roads."

These figures, striking as they are, do not tell the whole story. They take no account of the immense increase in the comfort of traveling, the saving of draught animals or the wear and tear of vehicles obviated by properly constructed highways. The good roads movement, like many similar ones, requires an immense amount of hard work to keep it going, but judging from the return on the investment made apparent by these figures it would appear rather more than worth while.—Charlotte Observer.

### The Birth of Reform Schools.

The first reform school for juvenile delinquents was probably the one organized at Metz, near Louvre, France, about the year 1839 by M. de Tetz, a noted councillor of Paris. M. de Tetz found in some wealthy noblemen the financial assistance he needed to materialize his idea, and the school was started with the most beneficent results. The idea was taken hold of in other quarters not only of France, but of other continental countries, and the enthusiasm created by the work resulted in the grand "conference of the reformatory union," the real beginning of our present day work in behalf of juvenile delinquents.—New York American.

### LAST PREPARATION SERVICE.

### Dr. Black Will Begin The Meeting Tomorrow Morning.

The last of the union prayer services in preparation for the Black meeting was held in the Methodist church last night. The service was led by Rev. J. H. Shore who talked on "Soul Winning." Three points were discussed as necessary for this—a personal knowledge of Christ, faith in His power to save, and a personal interest in the salvation of others.

Following the service there was a short rehearsal of the Gospel chorus under the direction of Mr. Burr, who arrived Friday evening. It is requested that all who are to take part in the chorus during the meeting shall meet him at the church at 7.30 tonight when there will be a rehearsal for an hour. This rehearsal will be held in the main auditorium of the church and all singers are to be assigned to their respective places so there will be no confusion. It is important that all the singers attend this last rehearsal.

Dr. William Black, the evangelist who is to conduct the meeting, will arrive this evening and hold his first service tomorrow morning. He has twice before held meetings in Greenville that accomplished great good, and judging from the earnest preparation for the coming meeting our people of all denominations are ready to co-operate heartily with him.

While here Dr. Black will be the guest of Gov. and Mrs. T. J. Jarvis.

### PERSONAL BRIEFS.

### The People Who Come and Go on Our Trains.

Mrs. D. J. Whichard went to Richmond today.

Mr. W. M. Moore and his daughter, Miss Ward, returned today from Aurora.

Mr. Andrew Burr, who is to direct the singing during the Black meeting arrived Friday evening.

Prof. C. W. Wilson returned Friday evening from Raleigh, where he attended a meeting of the executive committee of the State association of school superintendents and the legislative committee of the teachers' assembly.

Mrs. J. A. Lang has returned from a visit to her daughter in Hickory. Miss Maggie Smith, of Ayden, spent Friday night here with Miss Mary Kittrell.

Mrs. T. R. Moore went to Weldon today.

Mrs. W. O. Howard, of Tarboro, who has been visiting Mrs. J. G. Moye, returned home this morning.

Mr. H. McClelland went to Bethel today.

Mr. E. H. Thomas went to Robertsonville today.

On Thursday evening Dr. and Mrs. Moye entertained informally at their home on Evans street, in honor of Miss Sophia Sandler, of Baltimore.

Miss Florida Avera, of Rocky Mount, and Miss Gaddy, of Ayden, are visiting Miss Lizina Moore.

### At Home.

Friends cordially invited.

### End of The Century Club.

The End of the Century Club will meet with Mrs. D. E. House on Thursday afternoon, 17th, at 3 o'clock.

### High Prices.

Twenty years ago there was a general complaint against low prices; now times have changed and with high prices the complaint is just as vigorous and persistent against them. Surely the Southern farmer has cause for complaint if he regulates his affairs to suit present conditions. The increased price of cotton does him no good if he continues to buy his meat and other supplies from the northwest at corresponding increases. Conditions were never better for the Southern farmer who raises his own supplies at home. Raising home supplies gives a double advantage; it saves sending cash received for cotton to the west for high priced supplies, and the more supplies raised at home the less cotton can be produced. The two working together mean high prices for cotton and less for supplies. Then, too, the home raised produce is the best.—Charlotte Observer.

### LOCAL BRIEFS.

### Little Items too Short for a Head, but Interesting.

Having shows is quite a fad with the boys.

There will be a total eclipse of the moon on the 16th.

So many people got off the Atlantic Coast Line train this morning that it looked almost like an excursion coming in.

### Should Pay Their Debts.

More and more we are convinced that what this country most needs is a religion or training that will make a man pay his debts. Shouting does not settle account with God or man. Often we want to bounce a fellow right out of church because he went fishing on Sunday, but never say a word to the pious scamp who never pays his debts, and such people are doing the church more harm than any lot of Sunday deserters for there are more of them in the church. Reader are we getting close to you? Then lay down this paper and go and pay up and you can read at ease. And don't you stop paying because the "statute of limitation" excuses the open account which you made for bread and meat. You must pay it in cash or God will make you pay it in fire and brimstone. God knows no such excuse for paying as "homestead exemption." When you raise that excuse to keep from paying your debts you can stop singing, "When I can read my title clear to mansions in the skies." You've got none to there.—Louisburg Times.

### DAILY DUTIES.

The best things are nearest—breath in your nostrils, light in your eyes, flowers at your feet, duties at your hand, the path of God just before you. Then do not grasp at the stars, but do life's plain, common work as it comes, certain that daily duties and daily bread are the sweetest things of life.—Robert Louis Stevenson.

The Savannah speed races are also making a death record.

One, T. Roosevelt, of Oyster Bay, U. S. A., is about the dearest living ex-president.

Yes, North Carolina made a tea strike when it came to electing congressmen.

The Democratic party will have everything its way if it keeps on its good behavior the next two years.

Mexico had better come down from that uppishness, or Uncle Sam may go to smashing sombreros.

Perhaps the Panamans will have enough respect for the president's feelings to hold back their shouting while he is with them.

Just suppose all the Democrats had turned out and voted on election day. The majority would have been a corker.

If the States that went Democratic this time do the same thing two years hence, there is no question about the kind of president we will have.

It takes push and hustle to keep a town going on the up grade in business and progress. The town that makes no effort will see other towns go ahead of it in the race.

In the election Tuesday four women won seats in the lower house of the general assembly of Colorado. Guess the male members will be good in the presence of the sister law makers.

Anxiety for money leads even women to crime. While a millionaire pork packer of Wheeling, W. Va., was in a hospital, his wife bribed a nurse to give him poison. She wanted him out of the way so she could have his money.

The election of a Republican governor in Tennessee must be taken to mean that the solid South has been broken. The Democrats there merely fused with the Republicans in order to get rid of Patterson, and as Senator Taylor did not resign his place to run for governor no harm has been done.

**Starve a Cold.**  
Nature, as a rule, takes the appetite away when one is coming down with a cold or other infectious disease and Nature is wise. Don't coax Mary to eat when she has a cold. Don't allow the neighbors to tempt Johnny with calf's-foot jelly or other dainties.  
When suffering from a cold, the digestive organs are in no condition to care for food. The digestives are

**CHILDREN WHO ARE SICKLY**

altered, or entirely absent. One or two days' comparative fast will often assist in averting a severe seige of cold. A more convenient and enjoyable form of fasting would be to subsist for one to two days upon fruit, or fruit juices perhaps, with the addition of a little toast. An exclusive fruit diet has all the practical advantages of complete fasting, while it satisfies the appetite, and supplies sugar from which the liver can manufacture glycogen to sustain the white blood corpuscles in their continuous warfare against microbes.—William S. Sadler in the Designer.

**Anson County Boy Will Make Good.**

There is a boy in Anson county who farmed on his own account this year, renting a small farm from his father. He did his own work and did not spend his nights in drinking and carousing around the community, but got some wholesome pleasure at watching the results of his labor. He studied and followed the best and most up-to-date methods of farming and we have it on reliable information that he will clear not a cent less than five hundred dollars on the crop raised by himself, after rent and all other expenses are paid. He began during the first of the year and now has a few months to spend at another business where he will clear a few dollars every week. The man who thinks and works is making money; the man who loaf and dissipates, ought to starve.—Wadesboro Ansonian.

**3,000 Aerial Patents.**

Some idea of the interest taken by inventors in the science of aerial navigation is offered by the statement from Washington that 3,000 patents have been issued already on airships and aerial contrivances of various kinds. Stress is laid upon the point that the brains of the aviator must be the main dependence in all cases of successful man-flight. Hope has been expressed that some type of flying machine would be invented that would be automatically responsive to air currents in a manner to relieve the tension of the navigator and lend comparative safety and ease to the operation of the machine. If any such device is possible it is not presaged, it seems, by any of the patents yet issued.—Springfield Union.

**Additional Coast Line Service.**

The Atlantic Coast Line announces that beginning November 15th double daily Pullman service will be operated between Norfolk and Wilmington. Under the new schedule trains will leave Norfolk at 8:15 a. m., 3:45 p. m., and 6:20 p. m., and reach Norfolk at 8 a. m., 1:35 p. m. and 5:55 p. m.

Train No. 58, now leaving Greenville at 8:23 a. m., connects at Weldon with the train reaching Richmond at 2 p. m. and at Washington City 8:25 p. m.

Says the Greensboro News, (Rep), "All the same, we vote 'no' on the motion to make it unanimous. We are opposed to 5-cent cotton and no market for chickens and eggs at any price." That is precisely what we had when McKinley was president. Does the News mean to lead to infer that National administrations have anything to do with, or are responsible for, the price of cotton, eggs and the like? If it does, it takes a position that will hit Republican administration harder than any Democratic administration could possibly be hit. We should argue politics from a scientific point of view and not from the perspective of absurdity.—Wilmington Star.

The Times learns that last night a hazing episode happened at the Atlantic Christian College which came near having a serious ending, as a razor was handled rather awkwardly by one of the hazers. As a result of the unpleasant incident one student was expelled by Dr. J. C. Caldwell, president of the college today and demerits given to others. Dr. Caldwell has thus taken a vigorous step to stop this practice which happily has not before cached an objectionable form in the institution.—Wilson Times.

**The Lucky Party.**  
A gentleman was complimenting a pretty young lady in the presence of his wife.  
"It's lucky I did not meet Miss Hopkins before I married you, my dear."  
"Well, yes; it is extremely—for her," was the rejoinder.

Belated Advice.  
"That coat looks shabby," remarked Hicks to his intimate friend, the poet.  
"Why don't you have it turned?"  
"Do you think this coat has three sides?" asked the imprudent one sulkily. And nothing more was said on the subject.

**MONEY TALKS**

HERE'S ANOTHER MONEY TALK. IF YOU PUT YOUR MONEY in the BANK YOU WILL HAVE IT WHEN YOU NEED IT.

You keep your horse in a good stable, why not keep your money in a bank where fire nor burglars cannot harm it.

MAYER ROTHSCHILD, born in Frankfort, Germany, in 1743, and founder of the Great Rothschild fortune—the greatest on earth—peddled from house to house when a boy.

He saved his money. Economy and INTEREST, at a low rate, made this great fortune.

We pay interest at 4 per cent. on time Certificates.

## AWFUL PAINS FULLY DESCRIBED

A Lady of Pizarro Tells Story of Awful Suffering That Cardui Finally Relieved.

Pizarro, Va.—"I suffered for several years," writes Mrs. Dorma A. Smith, "with that awful backache and the bearing down sensations, so fully described in your book.

"I tried doctors and other medicines and found little relief, until I was induced to try Wine of Cardui, when I found instant relief and today I can heartily recommend Cardui to all suffering women and think there is no other as good."

In some instances, Cardui gives instant relief; in others, it may take a little time. But in all cases of female trouble Cardui can be depended on to be of benefit, as it is a specific remedy for women and acts in a curative way on the womanly organs.

As a general tonic for women, to build up your strength, improve your appetite, bring back rosy cheeks and make you look and feel young and happy, nothing you can find will do so much for you as Cardui.

Your druggist has it.

N. B.—Write to: Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64-page book "Home Treatment for Women," sent in plain wrapper, on request.

**Brown Eyes and Color Blindness.** Color blindness is one of the great drawbacks to a large percentage of men who would enlist in the United States marine corps, according to the recruiting officers.

"We have a box filled with different colored yarn," said an officer of that branch of the service. "We ask the prospective recruit to pick out green, for instance. If he is color blind he will invariably pick all the red yarn. We place it all back in the box again and ask him to pick out the red. In nine cases out of ten out will come the green.

"Another strange thing I have noticed is that most persons who are color blind have brown eyes. Once in awhile a person with eyes of a different color is afflicted that way, but as a general rule they are persons with brown eyes."—Kansas City Star.

### He Smoked.

"What a smell of smoke is about! Do you allow your husband to smoke in the parlor?"

"He doesn't, as a rule, but this morning!"

"You are very wrong to allow any exceptions whatever, my dear woman. You ought not to allow him to smoke under any possible circumstances, even once."

"But, my dear woman, this morning he simply had to smoke. His coat was on fire."—New York Journal.

**The Cooling of the Worlds.** All bodies in space are gradually approaching frigidity. When a red-hot cannon ball is taken out of a furnace and suspended in the air it parts with its heat and keeps on parting with it until it finally reaches the temperature surrounding it. And what happens to the cannon ball is happening to the sun. The sun is steadily losing its heat and contracting, and the same is true of the planets and of every other body in space. Just as the arctic circle is ever encroaching upon the temperate and equatorial regions, so the final chill is steadily advancing upon the warmth everywhere.—New York American.

### A Modest Poet.

There is a story told of a French poet who inquired of a friend and flatterer what he thought of his last work. "I have arrived at the fifteenth canto," he replied with enthusiasm, "and think there is nothing more beautiful and harmonious in the language." "Pardon me, there is one thing," said the poet.

"Ah, perhaps you mean Chateaubriand's 'Atala'?"

"Certainly not! I mean my sixteenth canto."

**The Original Encyclopedia.** The first real encyclopedia was Pliny's "Natural History." This work was an extensive one, numbering some thirty-seven volumes and dealing with all the then known facts of the world. Pliny, who died A. D. 79, collected the data for his work in his leisure intervals while engaged in public affairs. The "Natural History" was for its time an amazing production, treated of some 20,000 facts and was of very high authority throughout the entire middle ages. Forty-three editions of the work were printed before the year 1536, and no scholar's library was considered complete without it.—New York American.

### Wakeful Night.

A rather imaginative Washington lady decided she had insomnia. She couldn't sleep, she said. One morning she was more than usually depressed.

"What's the matter, dear?" asked the husband. "Another sleepless night?"

"Worse than that," she replied gloomily. "I did manage to drop off to sleep, and I dreamed all the time I was asleep that I was awake."—Philadelphia Saturday Evening Post.

### Made the Rhyme.

"Carpet" rhymes with no single word, but some bold poet dared to evade the difficulty thus:

"Sweet maid of the inn, 'tis surely no sin to toast such a beautiful bar bet; believe me, my dear, your feet would appear at home on a nobleman's carpet."—London Answers.

### Prussian Blue.

Prussian blue is made by fusing the bones of horses with impure potassium carbonate.

WHEN YOUR FOOD DOES NOT DIGEST well and you feel "blue" and tired and discouraged, you should use

By Wire to The Reflector.  
New York, Nov. 12.—Opening at  
slightly higher prices, the stock  
market after the first 20 minutes of  
trading displayed symptoms of a  
general decline, with the result that  
early gains were wiped out and sub-  
stantial fractional losses substituted.  
Among the leaders in the downward  
movement was St. Paul, which drop-  
ped 1-2, Canadian Pacific was ex-  
tremely weak, quoting at 196 1-8, a  
loss of 5-8 over yesterday's closing  
price. Southern Railway continued  
moving in spite of the market with  
a higher range in price.

New York, Nov. 12.—Cotton was  
easy at the opening from 1 to 5 points  
lower. Poor cables contributed to  
the narrowness of the market. The  
South was offering freely and there  
was a great deal of cotton on the  
market. Later the list recovered  
losses, but trading was light. Op-  
ening: November 14.45; December  
14.56; January 14.50; March 14.63.

Chicago, Nov. 12.—Wheat opened  
1-4 to 1-2c lower; corn 1-8 to 3-8c  
lower; oats slow and easy with oth-  
er grains; provisions lower all round  
Opening: December wheat 90 1-4;  
oats 31 3-8; pork January 17.35.

### THE SPITBALL.

It Takes Great Strength and Speed to  
Pitch It Properly.

Describing the spitball in baseball  
and the way it is pitched, Hugh S.  
Fullerton in the American Magazine  
says:

"There came into baseball in 1903 a  
ball which came near revolutionizing  
the game and brought a new era of  
pitching, made great pitchers out of  
'has-beens' and poor hitters out of once  
mighty sluggers.

"The ball is pitched with two, some-  
times with three, fingers held on one  
side of the ball and with the thumb or  
tip of the thumb and nail being grip-  
ped hard against the seam at the  
opposite side of the sphere. The top of  
the ball is made slippery at the point  
of contact with the fingers, so that the  
sphere slides off the fingers with the  
minimum of friction, while the thumb,  
pressed hard against the seam, gives  
the maximum of friction, the result  
being that the ball, leaving the hand,  
takes heavy 'English' from the thumb  
and starts revolving rapidly in the di-  
rection opposite to that in which it  
naturally would rotate. Therefore it  
whirls rapidly for a short distance un-  
til the natural but suspended motion  
of the ball overcomes the false 'Eng-  
lish' applied by the thumb and a con-  
test between the natural and unnatural  
forces ensues. The ball ceases revolving  
unnaturally and floats and wobbles  
until the natural twist overcomes the  
false one, and then the ball darts just  
as it would have done if it had been  
curved naturally, shooting in the direc-  
tion in which the heaviest friction was  
applied. A spitball if pitched direct-  
ly overhand darts almost straight  
downward, and if pitched side arm  
with the thumb toward the body it  
shoots outward and down as a fast  
outcurve does, the quickness and speed  
of the break depending entirely upon  
the amount of force with which it  
is thrown and in ratio to the amount  
of friction applied by the thumb or  
lack of friction by the fingers. Great  
strength and speed are essential to the  
best pitching of this kind of ball."

### The Quarrel.

Greene—My wife and I quarreled  
last night for the first time in years.  
Browne—What about? Greene—She  
thought the reason we had never done  
so before was due to her generous na-  
ture, and I thought it was mine.—Ex-  
change.

made of mud, saw grass and leaves  
and mold. They are sort of natural  
incubators, for the eggs, which are  
laid from thirty-five to eighty in a  
nest at one time, are hatched out by  
the steam which comes up through the  
mud as much as by the sun. Around  
the nest a pile of grass is laid, some-  
times as high as six feet, and from a  
distance resembles a stack of hay.  
The mother gator has her den near  
by. She makes it by burrowing into  
a bank of soft mud, and sometimes it  
is seventy feet or more inland. The  
only way to get her out of a den like  
that is to take a long steel rod and  
thrust it down the tunnel, which is al-  
ways slanting. When the gator feels  
the prodding she will come out to see  
what the trouble is.

"It takes alligator eggs two months  
and six days to hatch. When the little  
ones come out the mother calls them  
together by a noise which is something  
between a cluck and a grunt, and they  
all scramble down from the nest to her  
den. If it is on the edge of a river  
the den is filled with minnows. As the  
mother enters the den she swishes her  
tail around with terrific force, killing  
the smallest fish, and when they float  
the little alligators nab them up.

"A mother alligator will sometimes  
have four or five dens, and she takes  
her brood from one to another, repeat-  
ing the swishing process in each one  
until the young ones have had a full  
meal."—Harriet Quimby in Leslie's.
