

## URGES REGULATION OF COLD STORAGE BEFORE SENATORS

Senator McKellar, of Tennessee  
Tells of Need of Federal  
Regulation.  
SAYS IT WILL SURELY  
BRING DOWN HIGH COST  
Believes that Storage Plans  
Are Packer's Weapon for  
Higher Prices.

(By The Associated Press.)  
Washington, Aug. 14.—Federal regulation of cold storage of food was urged in the senate today by Senator McKellar, Democrat, of Tennessee, as a certain means of reducing the cost of living and as the only remedy for "the most outrageous piece of profiteering that can be imagined."

Speaking in support of his bill, first introduced in 1913 and now reintroduced before the senate interstate commerce sub-committee, considering high cost of living recommendations of President Wilson, Senator McKellar said if the bill had been passed in 1913 he felt sure the present conditions as to excessive living cost would not exist.

The meat packers were charged by the Tennessee Senator with using cold storage facilities to fix food prices.

"It is being used by the packers," he said, "for the purpose of controlling prices. As used by the packers it preserves in season of plenty and permits them to withhold such large quantities of foodstuffs from the market as to make a season of scarcity at any time they see fit and thus they increase the price to the consuming public."

Explaining his bill, Senator McKellar said it would limit the time foods could be held in cold storage and has been vigorously opposed by the packers.

"Heretofore I have been unable to get any action on this bill," said Mr. McKellar, "but I am constrained to believe that under existing conditions we will get action at this time. My bill does not fetter cold storage in any way but it regulates it as that the people can get the very best benefits out of it."

## ADMIRAL KALCHAK FORCES CONTINUE RETREAT TO URALS

London, Aug. 14.—Admiral Kolchak's forces continue to retreat to the Ural mountains. The Bolsheviks have driven the Cossacks back sixty miles south of Uriask and are endeavoring to separate them from the main body. It is admitted here that the reverses are a serious blow to the political interest in Russia.

## FOOD PROFITEERS ARE BEING CONVICTED ON EVERY HAND

Washington, Aug. 14.—Following the conviction of five of the first profiteers in New York, the government agencies are resolving their efforts to bring the food sharks to justice and more convictions are expected in the near future.

## DROP IN PRICE OF SHOES HAS NOW BEEN PREDICTED

Boston, Aug. 14.—Predictions of a decided drop in the price of shoes were made by leather dealers and shoe manufacturers who testified at the grand jury investigation of the high cost of living being conducted by District Attorney Pelletier. The consensus of opinion, however, was that the decline might not come for another year.

## BREWERS CALL CONFERENCE FOR SEPTEMBER THE 28TH

Atlantic City, N. J., Aug. 14.—Believing that a revulsion of feeling against prohibition can be concentrated for a repeal of the liquor statutes the brewers of the nation have called a big conference here for September 28. The meeting will last a week.

Arrangements for the sessions, which promises to be the largest and most important in the history of the industry, were completed by Hugh F. Fox, of New York, secretary of the United Brewers' Association.

## FARM IMPLEMENT DEALERS DISCUSS DAMAGE OF CROPS

Representatives of Eastern District in Session Here  
Yesterday.

BELIEVE DAMAGE WILL  
NOT BE SO VERY GREAT  
Several Members of Association Speak Briefly of the  
Situation.

The afternoon session of the Virginia and North Carolina Implement and Vehicle Dealers Association, which convened in this city yesterday morning for a general discussion of the situation facing the various industries of the nation at this time, undoubtedly proved one of the most helpful parts of the days activities as several brief talks were made by members of the organization from surrounding towns and cities which proved of more than ordinary interest.

The evening session was begun at 2 o'clock with several introductory remarks by the president, R. A. Flynn, of Wilson, who briefly outlined the condition of the crops throughout this section of the state and the result of the damage wrought by recent rains.

An intelligent and comprehensive survey of the final outcome of the situation was presented showing that although the planter had experienced no little loss when compared with last year's production, it was necessary that little apprehension should accompany the unusual sensation owing to the prospective prices for the future.

Several short talks along the same  
(Continued on page two.)

## GOLF ASSOCIATION TO REVIVE REGULAR NATIONAL MEETING

Annual Championship Tournament of Country Club to  
be Started Again.

Pittsburg, Pa., Aug. 14.—After a lapse of two years the United States Golf Association will revive the National Amateur Championship tournament at the Oakmont Country Club, Allegheny County, next Saturday. All of the leading American golfers, including the title holder, Charles Evans Jr., of the Edgewater G. C., Chicago, and some Canadian players have entered for this year's contest. In fact the field of aspirants is so large that it has been found necessary to begin with a weeding out or preliminary qualifying round of 18 holes medal play on Saturday, which will reduce the big field of entrants to 64 players who will take part in the regular qualifying round of 36 holes medal play which will start at nine o'clock next Monday morning. On Tuesday the thirty-two best scores will be paired for 36 holes match play, and each succeeding day the survivors will meet at match play until Saturday, August 23, when the pair of finalists will fight it out for the Championship title and gold medal.

This year's tournament will be the twenty-third held under the jurisdiction of the United States Golf Association which became the governing body of the game in America in 1895. During 1894 two amateur championship tournaments were held, one of them at Newport, R. I., in September and the other at the St. Andrews Golf Club, New York, the following month. At Newport, after two days of medal play, W. G. Lawrence of the local club was the winner with a score of 188 for 36 holes and C. B. MacDonald, of Chicago, finished second with 189. One month later in the match play tournament over the St. Andrews links L. B. Stoddart of the home club won by 1 up, C. B. MacDonald being the runner up.

## CONGRESS IS NOW AT DEADLOCK FOR TERMS OF TREATY

Independent Action Is Threatened by Certain Members,  
It Is Said.

SENATOR HITCHCOCK IS  
STILL ON WILSON SIDE  
Administration Leader Persistently Denies Any Former-  
er Negotiations.

Washington, Aug. 14.—The trend towards agreement on reservations in the peace treaty reached the stage today where the group of republican senators advocating reservations received assurance, which they accepted as guaranteeing democratic assent to their program.

Word reached members of the group, it was said, that as soon as they could pledge a score of republican votes for reservations to the league of nations covenant along the lines recently agreed on by several Republican senators, the administration forces in the senate would be willing to line up on that basis for ratification of the treaty.

There was an intimation also that the reservations had reason to believe their ranks eventually would include Senator Lodge, chairman of the foreign relations committee and Republican leader of the senate. Twenty Republicans, it was declared would be enough with the administration democrats to make up the two-thirds necessary for ratification.

begins next Monday.

Knights of Pythias meet tonight.

The August term of superior court

## EXECUTIVE BOARD LOCAL RED CROSS HAS FINE SESSION

Spirited Meeting Conducted in  
This City at Court House  
Yesterday.

The Executive Board of the American Red Cross of this county held a meeting in the court house yesterday afternoon, with only the chapters of Greenville and Winterville represented. The meeting had been called for the purpose of having Mr. E. A. Pound, division supervisor from Atlanta, give a talk on the Peace Program of the American Red Cross.

Mr. Pound paid a high tribute to Pitt for her part in the war and complimented the Red Cross for the wonderful art which it has played in the time of war and also the time of peace. He went back to the very beginning of the organization of the Red Cross, referring to Florence Nightingale and a Swiss doctor, who had seen the need of the Red Cross. He gave several interesting happenings in the camps where the Red Cross had played such an important part. "The American Red Cross saved the world, and won the war," he said, quoting the French. "It kept the morale of the French women and that kept up the morale of the French men."

He stated that a new day had dawned, and that the attention of the world was being turned to the great question of "Health." He stated how out of every 100 men sent to France, only 2 fell before the guns of the Huns, and in our own country, the best country in the world, fourteen babies out of every 100 die every year, due to ignorance and improper nourishment.

"Some people have the idea that because the war is over that the Red Cross has done its work and should cease. The Red Cross should live forever, and there is yet a great work for it to do," so declared Mr. Pound. In coming to the part that the A. R. C. is to play in the peace program, Mr. Pound stated that the doctors have predicted another epidemic of "flu."  
(Continued on page four.)

## KETTLES IS STILL GAINING STRENGTH RAPIDLY IT IS SAID

Wife Murderer Is Now on Permanent Road to Recovery, Is Believed.

NO LATE DEVELOPMENTS  
HAVE OCCURRED, IS SAID  
Wounded Man is Placed Behind the Bars of the County Jail House.

W. B. Kettles, who has been confined in the county jail in this city for the past several days as a result of shooting and instantly killing his wife at their home in Farnville some time ago and then attempting to end his own life by emptying the remaining two bullets of a .32 revolver into his own body, is today on a permanent road to complete recovery from the wounds received, and attending physician fully believe that the anticipated complications threatening to take place during his early confinement here have been practically eliminated as far as can be ascertained at this time.

In fact, the injured man has improved so much at this time that the county officials have found it advisable to remove him from his former location in the jail to a place behind the bars. This change in environment, however, has affected Kettles very little as he continues to maintain the splendid equanimity which has dominated his action since the last attempt to commit suicide, and therefore, appears natural and unassuming to county officials who have occasion to visit his quarters from time to time.

The man is proving the same puzzling to visitors as during his early incarceration in the jail, and displays not the slightest signs of any derangement suggestive in the ruthlessness displayed in the cold-blooded, unprovoked  
(Continued on page two.)

## FUNERAL RITES OF ANDREW CARNEGIE ABOUT COMPLETED

Remains of Noted Benefactor  
Will be Buried During  
This Morning.

Lenox, Mass., Aug. 14.—Arrangements for the funeral tomorrow morning of Andrew Carnegie were completed today after the arrival of Dr. William Pierson Merrill, of New York, from his summer home at West Weymouth. Earlier in the day the wishes of Mrs. Carnegie had been made known to her private secretary, Archibald Barrow.

Mr. Merrill, who will conduct the service, visited the Carnegie home. He also conferred with Rev. Benson J. Wyman, pastor of the Lenox Congregational church, who will assist him when the details of the service were decided upon. At the wish of the family, nothing was made known regarding tomorrow's rites, except that the Presbyterian service for the dead would be used. This provides for a reading from the Scriptures and a prayer.

There also will be vocal numbers provided by the quartette from the Brick Presbyterian church of New York of which Dr. Merrill is pastor, and which Mr. Carnegie had attended for eight years.

Arrivals today of those who will attend the funeral included: Charles M. Schwab, Robert A. Franks, treasurer of the Carnegie Corporation; Mrs. Henry Phipps, of New York, and Rev. Frederick H. Lynch, formerly Congregational minister here, who represented the Carnegie peace foundation abroad during the war.

## ARMY WORMS ARE DOING DAMAGE IN THIS PART STATE

County Agent Warns Against  
Work Now Threatening  
Nearby Crops.

ARSENATE OF LEAD IS A  
SUGGESTED FORM TO USE  
Deep Furrows Around Fields  
is Also Another Remedy  
Against Worm.

Most of you are familiar by now with the Green Clover Worm that is eating soy beans, we now have in this county another very serious caterpillar known as the Army Worm, this worm does not confine its operations to any one crop, but will eat crab grass, corn fodder, cotton leaves and other plants, is about one and one fourth inches long when grown, and has a stripe down his back, or the species that is working here has.

Control  
Use arsenate of lead as you would for tobacco worms or potato bugs, or plow a deep furrow around your field using a turning plow, if they already there throwing the dirt towards the field and leaving the straight side for the worm to climb which he will find hard to do, also make up a batch of corn meal, molasses and Paris green, with this dough scattered in the furrow many will be poisoned, still another remedy that works is to fence a lane four or five feet wide around the infested field and turn hogs in the lane, they will not let any worms get through, I saw this working over near Arthur this week.

Hay Crops  
I don't understand why the farmers of this county and eastern North Carolina don't grow enough hay or long feed for their live stock, it is very easy to do as is proved every year by a few men in each community. It will  
(Continued on page four.)

## RECENT ELECTION OF APPLETON SAID TO BE GOOD SIGNS

Election as President of Federated Trade Union Holds  
Finds Prospects.

New York, Aug. 14.—The election of William A. Appleton as president of the International Federation of Trade Unions at the recent congress of that federation in Amsterdam is characterized as a hopeful sign, by the American Alliance for Labor and Democracy in a statement issued here. Mr. Appleton is described in this statement as constructive, progressive and democratic.

For years, says the Alliance, Mr. Appleton has been secretary of the General Federation of Trade Unions in England. In 1917 he visited the United States as head of a delegation representing the General Federation of Trade Unions. Pointing out that Mr. Appleton was nominated by Samuel Gompers to head the international labor movement, the Alliance statement adds:  
"Mr. Appleton always has been a staunch friend of the American Federation of Labor and an ardent admirer of its policies and achievements. More than any other European leader of labor, he thinks in accord with Samuel Gompers. During the war Mr. Appleton was tireless in his work for victory."

## BRITISH PRESS APPROVES VISCOUNT GREY'S ACCEPTANCE

London, Aug. 14.—The British Press has approved Viscount Grey's acceptance of temporary ambassador to the United States.

Old Virginia Pound Cake, 40c per pound. People's Bakery. 14-17

## FOOD CONTROL TO REACH DEALERS IN ITS BROAD SCOPES

Federal Food Control Act to  
Reach Clothing Dealer  
as Well as Food.

NEW YORK CITY GROCER  
FINED FOR SUGAR SALE  
Government Fully Intends to  
Choke Hogs as Far as  
this is Possible.

(By The Associated Press.)  
Washington, Aug. 14.—Important new developments in the government's fight to reduce the high cost of living came today.

One of the most interesting was the announcement by Attorney General Palmer that the first federal constituent for profiteering had been obtained. District Attorney Aucey telegraphed from Binghamton, N. Y., that a retail grocer had been fined \$500 for selling sugar at 15c a pound. No details were given and the laws under which the case was brought were not known here.

"A few good cases of profiteering in each state will settle that trouble," Mr. Palmer remarked. In order to bring to book persons guilty of raising prices exorbitantly or hoarding food to advance prices, Mr. Palmer submitted to the agricultural committee of congress the draft of an amendment to the food control act extending its provisions to clothing, and containers of food and seeds, and providing a penalty of \$5,000 fine or two years imprisonment or both for violation of the law.

Three cabinet officers asked special appropriation from congress for the campaign against inflated prices. Secretary Redfield requested \$40,000 for the work of the bureau of standards in assuring full weight and measures and of the bureau of fisheries in introducing new fish food. Secretary Wilson asked for \$475,000 for the employment of special agents and Mr. Palmer requested \$1,000,000 for the bureau of investigation and for the expenses of state food administrators assisting the department of justice.

## RUMANIAN TROOPS ABOUT TO BUDAPEST, IT IS STATED

Amsterdam, Aug. 14.—Rumanian troops are about to leave Budapest following the receipt of a note from the peace conference the Vienna Dispatch states.

## NAVY ASKS FOR FIFTEEN MILLION TO REPAIR SHIPS

Washington, Aug. 14.—The navy is to ask for fifteen million dollars more with which to repair ships.

## CARNEGIE'S FUNERAL TAKES PLACE AT COUNTRY HOME

Lenox, Aug. 14.—Carnegie's funeral was held today at Shadowbrook, his country home. There was no eulogy nor pall bearers. The service was simple, the ritual of the Presbyterian church being used by Dr. William Pierson Merrill, pastor of the Brick Presbyterian church, of New York, where Carnegie attended. Sixty persons attended, half being members of his household. The body was taken to Tarrytown for burial, in the Sleepy Hollow cemetery. The floral tributes were many.

## RUMANIANS ARE STRIPPING COUNTRY, SAYS REPORTS

Vienna, Aug. 14.—Rumanians according to Budapest reports are stripping the country and seizing the railway lines, food and medical supplies.

## WANTED 300 STEMMERS

The Imperial Tobacco Company has purchased 14 stemming machines to stem common tobacco, but will continue to stem all good tobacco by hand and they want 300 stemmers at once.

WEDNESDAY, AUG. 13, 1919

**THE SOY BEAN WORM WILL ATTACK AGAIN.**

Studying the soy-bean worm at his laboratory station near Elizabeth City, Mr. Franklin Sherman, chief of the division of Entomology, has found some important facts about this insect pest and believes that it will attack again in about three weeks, at which time another brood will have been hatched out. The following information, secured through Mr. Sherman's observations will be of interest to farmers in the affected districts:

"The great bulk of the worms which have caused the damage are now maturing, they must now change to the chrysalis, then to the moths, the moths must lay eggs, and eggs must hatch, before another destructive generation. We are, therefore, now due to have an interval of about three weeks during which the worms will be less numerous—of course there will be some present all the time. During this interval the beans should recover to a large extent for the worms do not except in worst cases eat the older leaves, and they do not eat out the growing bud.

"Between the 1st and 10th of September the next brood of worms is due to hatch out and if they are numerous enough to be destructive, they should make their presence evident before September 15th. Whether they will be numerous enough to make

treatment necessary no living man can foretell. You can figure the probabilities either way from the following established facts: (1) The insect has been with us many years, but this is the first time it has been very serious, this would lead us to believe that the next generation may fall to its usual inconspicuous level, but—(2) on the other hand I have observed only a very small percentage to be attacked by other insects, parasites, or disease and this would lead to the belief that the next generation may be fully as large as this one. As between these two lines of reasoning I incline to the optimistic belief that the next generation will be noticeable, but not so destructive as the present generation.

The remedy—Poisons, same materials and same methods of applying as for potato-beetles. But nobody knows, yet what strength of poisons the bean plants can stand, and we know that Paris green is apt to burn leaves. We are giving the preference to a dry dust mixture at rate of 1 pound powdered arsenate of lead to 8 pounds slacked (dust, or hydrated) lime. Dust on lightly and evenly, enough to whiten the young leaves, top part of plant. My own tests show this to be a good remedy, and we have reason to believe that it will be safe to use the forage if it stands in field 2 weeks or more after treating, but we expect to test this matter and announce results before time to use the hay.

"And if a merchant or farmer lays in a stock of the remedy which there is no present use for, it will still be useful next spring for potato beetles, tobacco worms, caterpillars, or any other leaf-eating insects."

**THE DREAM WE DREAM.**

Suppose we had in every county in North Carolina a body of closely integrated social servants composed of (1) the school board with its superintendent and supervisors, (2) an agricultural board with its home and farm extension agents, (3) a public health board with its whole-time, health officer, its public health nurses, its clinics and dispensaries, (4) a public welfare board and its secretary charged with specific social concerns, and (5) a ministerial board composed of all the churches busy stamping every common effort with the ultimate values of life and destiny, time and eternity—suppose, I say, the civic and social mind of North Carolina were organized and federated in this way? If only it could be so, and it can, then what an era of democratic wholesomeness and effectiveness we should enter upon, and how rapidly our beloved state would move to the fore in the new social order that is even now breaking upon the world.

Man freely self-surrendered to his fellowkind and wholeheartedly given in organized effort to the common good is the dream we dream. Man dedicat-

ed to the state is Prussianism; man dedicated to humanity, in His name, is the last word in any kind of religion that is worth calling Christian. The Kingdom of Heaven doubtless means much more than this, but I am sure that it ought never to mean less.—E. C. Branson, an address before N. C. Social Work Conference.

With clothes around the century mark per suit the sports will have to get along with fewer changes in their wardrobe. One wit remarked the other day that his suit case had already been reduced to 53 articles, a deck of cards and one collar.

As Senator Lodge has unloaded his anti-league of nations speech, perhaps the consideration of this and other matters can go forward.

Looks like New York could as well afford to be dry as the rest of the country.

According to Mr. Palmer's decision older has run the prohibition gauntlet.

If crime is a disease there is a big bunch of sick folks.

**KETTLES IS STILL GAINING STRENGTH RAPIDLY IT IS SAID**

(Continued from page one.)  
murder of his wife, and his attempt to end his own career as a result of a promise which he declares to have made here before the unfortunate occurrence. There is not the slightest indication of insanity in speech or action, as his calm, unperturbed, show the natural outgrowth of a determination to play the game until the last.

No new developments have occurred tending to throw the slightest ray of light upon the tragedy, and everything which Kettles has to say at this time is nothing more than a complete repetition of the stories related when he was brought here laboring under great pain and apparent depression. The authorities have discovered little evidence that conveys any intelligent information as to the cause of the distressful occurrence, and therefore, the only thing which can be accepted is that found in Kettle's own confessions.

**ADDITIONAL APPROPRIATION FOR REHABILITATION**

Congress Increases Amendment Given for Disabled Men's Vocational Training to \$14,000,000. Canada Gives More Than Twice as Much.

Washington, Aug. 14.—Recent legislation in congress has increased the appropriation for the vocational rehabilitation of the disabled soldiers, sailors and marines to the sum of \$14,000,000. This work is under the charge of the

Federal Board for Vocational Education. The allowances made to the men during the period of training has also been changed. Instead of \$65 a month a single man without dependents now receives \$80, and a man with dependents, in place of the \$75 he formerly received, is now paid \$100 plus the sum allowed as family allowances.

It is interesting to note in connection with this appropriation of \$14,000,000 made recently by congress for the re-establishment in civil life of disabled ex-service men, that Canada last year gave \$32,368,000 for a similar restoration of injured members of the Canadian Expeditionary Forces. More than two dollars for every one given by the United States is Canada's estimate of the need. Considering the difference in our populations and our resources our northern neighbor deserves our admiration.

**WILSON MAY VETO DAYLIGHT SAVING BILL, IS THOUGHT**

Washington, Aug. 13.—It is indicated that President Wilson will veto the daylight saving law before the end of the week.

**FARM IMPLEMENT DEALERS DISCUSS DAMAGE OF CROPS**

(Continued from page one.)  
line of thought followed the introduction by the president, and as a result, each individual representative was enlightened as to what to expect in the future trade, and just what will be required in making the year of greater possibilities to both the planter and to various trades. The meeting was informal throughout its entirety, as executive session was abandoned during the early hours of the meeting.

The association meets in various cities throughout the bright leaf tobacco district every month, and the fact that this was the first time Greenville had entertained the implement dealers in quite awhile, the meeting was of more than ordinary interest.

"Smoke Virginia-Carolina Straight"

# For 300 years Virginia-Carolina tobacco has made good!

From the beginning Virginia-Carolina has been the world's favorite tobacco.

It has been cultivated and improved for three centuries. Today—five times more of it is smoked in cigarettes than all the foreign-grown tobaccos combined. Only the lively taste and rich flavor of Virginia-Carolina tobacco can account for this.

And only in a cigarette made entirely of Virginia-Carolina do you get the full flavor and all of that relish and zest.

Put the proof up to Piedmont.

The following marriage licenses have been issued by the register of deeds for registration since the report of yesterday evening:

Colord—Tate Cox, of Winterville, to Spartie Edwards, Winterville.

Preparations are well advanced for the colored firemen's convention here next week.

**IMPROPER FERTILIZER DAMAGES TOBACCO CROP**

West Raleigh, N. C., Aug. 14.—At this season, when tobacco is being harvested, growers in many sections are making inquiry as to the cause of a spotting of the leaves which damages the quality of the crop. In a number of instances it is apparent that no specific organism is responsible for this condition, says Dr. F. A. Wolf, Plant Pathologist of the Experiment Station, that an improper balance or proportion of the essential fertilizer elements has been used.

Investigations have shown that the use of too much nitrogen will make coarse, dark green tobacco, which, when it approaches maturity, has a tendency to become "specked" or "diseased," as shown by the presence of reddish brown, dead spots. When an insufficient supply of potash has been applied, the leaf tissues between the veins become pale, and before the leaf has properly matured, are dry and dead.

It is realized that its general rule, applicable without the exercise of judgment by the grower, can be given to govern the best proportions and the proper amounts of the essential elements in a fertilizer for tobacco, since accounts must be taken of such factors as the character of the soil, its humus content and its state of tilth. A recent bulletin on "Tobacco Culture in North Carolina," by E. G. Moss, contains certain facts, however, which will serve as a working basis for the grower in the solution of this fertilizer problem. This bulletin, Number 237, of the Experiment Station series, may be had on request.

**"In order to thoroughly satisfy the needs of the body, diet must be varied."**

"In other words, it appears that with a mixed diet, the same person will digest a larger proportion of nutrients than with a diet composed of a single food-compound."

**JURY SERVED WITH SOUPS**  
AT FASHIONABLE TEA PARTY  
Los Angeles, Cal., Aug. 14.—A \$95,000 "tea party" was held in the court of Superior Judge George H. Cabanis when attorneys distributed dishes to the jurymen and women served them with tomato soup.  
The American Trading Company sued the Martinez Canning Company, charging that \$95,000 worth of tomato paste it purchased was not fit for consumption.  
The evidence was served to the jury and a recess declared in order that they might commune with their "tumblers" and palates.

SOLD BY DRUGGISTS EVERYWHERE

**ARMY WORMS ARE**  
**DOING DAMAGE IN**  
**THIS PART STATE**  
(Continued from page one.)  
soon be time to sow oats and why not sow some vetch along with them, you not only get better feed and more of it to the acre by sowing both, but the vetch is a legume, a nitrogen gatherer, and your land will be in better shape for a corn crop next year after vetch and oats, than if it lays bare all the winter, a smoothing harrow will put in your vetch seed deep enough, and don't forget to inoculate if you want good results.

Crimson clover is another good winter legume, and it has been grown successfully in many parts of the county, it not only gives you a good hay crop in the spring, but also stores up much nitrogen, a corn crop will make good following clover, of course you will get it in a little later than you probably would if you had no clover, but it certainly is worth while.

I have some good prices on Crimson clover seed recleaned, if interested get in touch with me at once.  
Let me urge you to plant a hay crop of some kind this fall, hay is going to be scarce and high next year, and don't depend on a spring crop of oats as they are very uncertain.

**J. ELLIS DODSON,**  
County Farm Agent.

**EXECUTIVE BOARD**  
**LOCAL RED CROSS**  
**HAS FINE SESSION**  
(Continued from page two)  
As a means of combating this disease he suggested that classes in home nursing be started, and suggested the advisability of employing a graduate nurse to teach the classes, which are to be organized in different parts of the county. He emphasized the fact that Home Hygiene and care of the sick, must be taught to the people.

Miss Myers, the health nurse, is to see each chairman of each auxiliary and state to them exactly what the classes are to be composed of and see what they think about the classes being organized in their respective towns.

Mr. Pound stated that North Carolina is making more rapid strides towards health than any other state, and complimented Pitt, for having the public health nurse.

His talk was interesting and beneficial, and it is to be regretted that such a small crowd was present to hear it.

**NOTICE TO JURORS AND WITNESSES.**  
All witnesses and jurors who have been summoned to court on Monday the 18th day of August, need not attend until Wednesday, the 20th day of August, as there will be no court until then.  
**E. R. DUDLEY,**  
14-23 st. Sheriff Pitt County.

**FINAL SOLUTION RAILWAY**  
**PROBLEM IS NOW REACHED**  
Washington, Aug. 14.—Final solution of the street railway problem can come only when a power to regulate wages of street car employes as well as fares is created, the federal street railway commission was told today by W. C. Bliss, chairman of the Rhode Island public utilities commission. The time is approaching rapidly, he said, when mere increases in fares will no longer solve the financial difficulties of the roads.

**CITY OF VINNITZA HAS**  
**BEEN ABANDONED IS SAID**  
London, Aug. 13.—The city of Vinnitza in the Ukraine, 175 miles southwest of Kiev, has been abandoned by the Bolsheviki, according to a Moscow report. Nvolhynin, the anti-Bolsheviki occupied the Lutzka railway center. Brussels Belgium troops will occupy the Maledeny district of Rhenish Prussia, states soon.
