GOVERNOR AND CHIEF JUSTICE HONOREES AT BIG BARBECUE

Everetts Entertain at Family Home in Honor of Governor and Visiting Chief Justice

Swamp Lawn, a few miles from Palmyra, the family home of the Everetts, was the scene of a delightful affair yesterday when Messrs. R. O. Everett, of Durham; S. J. W. R., B. B., and J. A. Everett; Misses Hattie and Margaret Everett and Mesdames Blanche Harrison, of Palmyra and V. W. Leggett, of Hobbgood, members of the Everett family and owners of the family estate, were the hosts and hostesses at a barbecue in honor of Chief Justice of Supreme Court of Iowa, J. W. Faville, who with his wife is the guest of Mr. R. O. Everett, of Durham; Governor A. W. McLean, Col. Benehan Cameron and S. H. Venable, owner of Stone Mountain, Atlanta.

The delightful occasion followed the commencement exercises of the Oak City public schools at which Governor McLean delivered the annual address.

Upon arrival at Swamp Lawn the guests were greeted in a manner typical of the genial Southern hospitality and were introduced to the guests of honor. When all the guests had gathered they were requested by Mr. R. O. Everett, one of the hosts, to witness the planting of three additional oaks to the already great grove that surrounds the colonial mansion.

With short talks the three trees were planted by Governor McLean, Chief Justice Faville and Colonel Cameron. The guests were next bade to repair to an arbor of long leaf pine beneath which tables decorated in the colors of the Commonwealth of Iowa were arranged for the repast.

At this juncture Mr. S. J. Everett, one of the hosts, delivered an address of welcome to the guests on behalf of the Everett family, which was followed by a greeting on behalf of the community by Mr. W. Ashby Dupuy, of Scotland Neck.

The luncheon then served in southern style consisted of Rock Mudd's followed by barbecue and an ice course. The luncheon was unique in that with the exception of the ice course the ingredients were produced on the Everett plantation, the rock being a product of the Roanoke being a product of the Roanoke river, which borders the estate, and the barbecue, breads and accessories being prepared from the home grown products of the great farm.

Mr. R. C. Everett, of Durham, master of ceremonies, called upon the guests of honor for a few remarks. Chief Justice Faville, the first of the speakers expressed keen delight at the genial spirit of hospitality that he and his wife had found within the borders of this great state stating that the memories of the occasion would long remain vivid in their minds. He called particular attention to the souvenir which accompanied the ice course. These souvenirs consisted of a hand painted American shield on one side of which was the flag of Iowa together with a reproduction of the tall corn for which that state is famous and on the other side of the shield was the flag of North Carolina together with a sprig of the Long Leaf Pine. "This little shield," the speaker declared, "is expressive of the close unity of the two states and except for geographical location the two states should be twins." The speaker concluded his talk with a poem of his own composition in which he paid tribute to the Commonwealth of North Carolina and declared an everlasting bond of friendship between it and the state of Iowa.

Governor Angus W. McLean, the next of the guests of honor to speak, expressed great appreciation at having been thus honored and paid high tribute to the upholding of the family traditions by these sons and daughters who were then acting as hosts. He also paid tribute to that great section of the state and especially to the memory of the two great statesmen, Claude and William W. Kitchin who were sons of that soil.

Held in Raid

Mrs. Helen Heyworth divorced wife of Otto Young Heyworth, Chicago heir to \$15,000,000, who shocked her acquaintances some time ago when she publicly announced she was engaged to "Dapper Don" Collins, international crook, was recently arrested in New York City in a raid upon her apartments in which it was alleged, drugs were found. She averred a "joke" must have been played upon her.

AMUNDSON ON VERGE STARTING TO NORTH POLE BY AIRPLANE

Dispatches Say Two Planes of the Expedition Preparing Leave King's Bay

New York, May 7.—Captain Roald Amundson the Norwegian explorer today was presumably on the verge of starting his attempt to reach the North Pole by air plane. Dispatches yesterday said the two planes of the expedition were preparing to leave King's Bay, Spitzbergen, for the Northern Part of the Archipelago where the actual dash is to be made, but further word is lacking from the explorer base where communication is difficult because of its remoteness. The Norwegian government steamer assigned to the expedition has reported her arrival off Amsterdam Island lying to the north west of Spitzbergen, and roughly 680 miles from the pole.

The message from the vessel said a northern wind is blowing and snow is prevailing, but the sea is smooth and the temperature is eight degrees above zero.

Charges Ford Motor Company With A Criminal Conspiracy

Jackson, Miss., May 7.—William J. Miller, State Revenue Agent, today filed in the Chancery Court, here a suit against the Ford Motor Company charging a criminal conspiracy to violate the anti-trust laws of Mississippi, and seeking to collect penalties totalling \$12,000,000.

subject the "Good Roads of the Nation." Beginning with the network of roads that connect all parts of our state, Colonel Cameron in brief explained just what such roads meant to the nation and he outlined plans now under consideration for international highways through Mexico and Central America into South America connecting all the nations of the western hemisphere.

Following the talks of the guests of honor, Mr. S. S. Nash, of Tarboro, expressed the appreciation of all the guests at having been present on the happy occasion and spoke words of praise at the great work that was being carried on by the sons and daughters of his dear friend who in former years commanded the great plantation.

Throughout the affair was one of friendship and good fellowship and the more than one hundred representative citizens from various parts of the state who gathered there greatly enjoyed the happy occasion and wished happiness and long life to the hosts, guests of honor and others present.

CAMPAIGN HAS BEEN LAUNCHED AGAINST LIQUOR RECENT MANEUVERS SHOW WEAKNESSES IN PACIFIC DEFENSE

Warfare Against Rum Row Gets Underway on Sea, on Land and in the Air

New York, May 7.—On sea, on land, and in the air, a posse of prohibition enforcement today directed the attack in the war of extermination against rum row, and its satellites on shore. During the night the fleet operating against rum row had the added task of battling against a 45 mile gale. With the blockade of rum row, said by Federal Agents, to have been made 100 percent effective in less than two days, prohibition agencies in New York and the surrounding counties, have initiated a clean up, which they say will make it impossible to procure liquor. Padlocks are rapidly mopping up liquor that seeped ashore before the blockade. One development expected to be helpful in the dry law enforcement, was the discovery that persons who informed the government of violations may receive 25 percent of the fine assessments against the offenders, and may obtain one fourth of the proceeds from the sale of confiscated boats.

Some Canadian war veterans are stirred up over the blockade. At a meeting at British Columbia, speakers said that the big fleet operating against rum row was violating the Washington Conference Agreement for limitation of Naval Armament. More than 60 boats, large and small, are now patrolling rum row and the fleet is directed by wireless from Washington, and aided by a detail of 13 aeroplanes.

Reserved boats are ready to steam out to sea at a moment's notice in case of emergency. The first ship seized by the fleet contained 25,000 bottles of Scotch whiskey, and 7,000 gallons of alcohol, while the ship itself is valued at \$150,000.

LULL ON FIGHTING FRONT IN MORROCO

Although No Fighting Has Taken Place Since Yesterday Another Engagement is Expected

Paris, May 7.—A lull is reported on the fighting front in Morocco, where Rifian tribesmen under Abd El Krim, after crossing the neutral strip along the Spanish frontier, are attempting to secure a foothold in the French Zone.

Advices received here tell of no further fighting since yesterday, but another engagement is expected. The French Command, under Marshal Lyautey, the Governor General, will probably feel out the strength and disposition of the enemy forces by a series of reconnaissances before undertaking a movement with its combined column to drive the invaders back over the border.

French military men say it is fully realized that the Rifian tribesmen are foremen, men to be despised, due to their experiences in fighting. Yesterday they gave unexpected trouble when the veterans, who are well versed in modern methods of warfare, lead the advances against the French lines. The sudden stiffening of the rebel front is recognized as serious and French reinforcements numbering 6,000 men, will soon be on the ground.

Sound Money Helps Cupid.

Berlin.—The stabilization of money in Germany has caused an inflation of love. The number of marriages has steadily increased since the rentenmarke landed on a firm basis in 1924, and is rapidly approaching pre-war figures.

Prices of furniture are higher than before the war, but since young couples today know their money has a stable value, they are willing to take the plunge into matrimony which looked too uncertain in the days when their paper money was dropping every hour.

Recommends That Resisting Power of Oahu Be Made of the Strongest Possible Character

Honolulu, May 7.—The Army-Navy maneuvers centering around the battle of Oahu fulfilled the original object to test, with existing plans for the defense of Oahu, uncovered defects and exercise the army and navy forces in conduct of joint operations, opinion of Admiral Robert E. Cronz, and Major General John L. Hines, Chief umpires, as expressed in their final summary of the maneuvers issued today. The defects disclosed, in both the island defense and the fleet, have been the basis of a special report and recommendations to the Secretaries of the war and navy, the umpires stated. It was recommended that the departments make the resisting power of Oahu of the strongest possible character, the umpires pointing out that the defenses constituted the key to the Pacific.

Despite the virtually unanimous official opinion that the "Blue" attacking fleet won the war, the statement of umpires failed to mention the outcome, or point out particular weaknesses of the defense and the "Blue" fleet, which were discovered as result of the action. It was understood unofficially, however, that the principal weaknesses displayed were in the air craft operation, which formed the most controversial phases of the operation. It was believed unofficially that both the "Blue" and the "Black" air craft squadrons failed to function as well as might be expected, and both the land and sea aviation forces needed considerable strengthening and enlargement. High officials declined to be quoted on this question, except to say "we need more and larger air planes on Oahu." Some suggestions have been made that the "Black" air craft composed of army and navy planes might have been operated more effectively had they been under unified command. That suggestion referred only to the Island of Oahu where the main army and navy aviation are located, the chief umpires said.

1,318 Persons Given Employment During Week Ending May 2

Raleigh, May 7.—A total of 1,318 persons were furnished employment by the national and state employment service, during the week ending May 2, the report of Frank D. Crist, commissioner of labor and printing made public tonight shows. The majority of these, states Mr. Crist, were unskilled laborers sent into the strawberry section of Eastern North Carolina to pick berries. A recent campaign was conducted by the department in order to relieve the shortage of workers in the berry fields and it is stated that the campaign resulted successfully and the berry growers were enabled to get their crops gathered and to the markets. The department was able to assist in this movement of the crop to the extent last week of sending 652 workers into the section.

The weekly report shows that Wilmington section led in the number of male persons furnished employment, this being the portion of the State from where the strawberry pickers were sent out. This section's office furnished employment to 768 persons while Charlotte came second with 124. Asheville was third with 100. Greensboro led in the number of women furnished work, 35 being able to locate jobs in that section. Asheville was second with 23.

During the week 1,282 men and 205 women registered with the department requesting positions; 13,227 requests for male aid and 158 for women were received and 1,181 men and 137 women were furnished employment.

First Casualty in Rum War

THE "K-14937" CAPTURED RUM RUNNER, Just as it was exploded.

The first capture in the new war on Rum Row, conducted by the greatest Coast Guard fleet ever assembled, was this boat, called the "fastest rum-runner." She was taken ashore at Parkertown, N. J., and beached by Coast Guards, after a number of cases of liquor were unloaded. Shortly afterwards, a man, who said he was a part owner, strolled up, suddenly opened the gasoline cocks, and threw in his cigar butt, with the resulting explosion snapped in the unusual photo above. He escaped after saying he would rather destroy the \$25,000 boat than have it used in the anti-rum patrol.

MRS. SHEPHERD AT LIBERTY TODAY ON OWN RECOGNIZANCE

Named as Accessory in the Deaths of Young McClintock and His Mother

Chicago, May 7.—Mrs. Julia Shepherd, named as an accessory of her husband William D. Shepherd, alleged slayer of William N. McClintock, the orphan millionaire, was at liberty today on her own recognizance after surrendering last night. Her release on a \$5,000 bond was promised by Judge Hopkins before whom she appeared, and pending arrangement of the bond she was given her freedom at subject to the call of the court. The coroner's jury had recommended that she be held as accessory to the death of young McClintock and his mother. No opposition to her release was made by Robert E. Crowe, State Attorney, who strenuously resisted efforts to release Shepherd, now in jail pending trial on May 18.

For the first time since his arrest several weeks ago, Shepherd was taken from his cell to converse with his wife, after arrangement for her release had been made. Afterwards she termed the jury's action as prosecution. The acquiescence of the prosecutor in the arrangement for Mrs. Shepherd's release came after he expressed resentment at the naming of Mrs. Shepherd by the coroner's jury. He maintained that the jury's action would interfere with the trial of Shepherd.

AIRMEN GRATEFUL TO CITIES TELL THEM THEIR NAMES

Washington.—Advertising for the benefit of those who ride in the air is seen by army air service officers as a possibility.

Thus far this branch of letting the world know, is confined to cities that blazon their names literally from the housetops. This is coming to be recognized as a vital factor in flying, enabling the aviator readily to discern his whereabouts simply by looking over his cockpit to where giant white letters, painted on the roof of a large building, gaze up at him. The number of communications that are thus setting forth their names is substantially on the increase, army airmen say.

Large cities have their own landmarks, the Washington monument and the dome of the capital being two of the best anywhere.

NEEDLEMAN SAYS HENRY D. GRIFFIN LEADER OF MOB

Declares Griffin Performed the Operation, With F. W. Sparrow, Jr., as Chief Assistant

Williamston, May 7.—Joseph Needleman testifying in the trial in Martin County Superior Court here this afternoon of the four men charged with his mutilation after removing him from the Martin county jail, named Henry D. Griffin as the man who performed the operation upon him, and F. W. Sparrow, Jr., as Griffin's chief assistant in the crime. Griffin and Young Sparrow were two of those indicted for the crime of mutilation, and Griffin is one of the four men now on trial. Sparrow's trial has been temporarily postponed as he is sick in jail in Washington. Following Needleman's testimony today Solicitor Gilliam indicated the state would rest late this afternoon.

Griffin, the witness asserted, was the leader of the mob.

"He tried to get some other man to do it," he stated, "but they would not."

"I will do it myself," he then said, "and he did."

"Sparrow," he added, "was Griffin's chief assistant in performing the operation."

Williamston, May 7.—Testifying as a state witness of the trial of four men charged with mutilating Joseph Needleman, Albert Gurkin, in Martin County Superior Court here today identified 17 men as members of the mob which removed Needleman from the Martin county jail and performed the operation upon him. Among these named as members of the mob were John Gurkin, his brother, and the state has announced will not be prosecuted as one of those performing the operation, but as an accessory before the fact. In return John Gurkin was to take the stand for the state.

Resolutions Dealing With International Topics Attract Attention of Delegates at First Session Today

Washington, May 7.—One of two squalls besetting the course of the International Council in the convention here, appeared to be diminished today, but one displayed indications of renewed activities. American Patrons of the convention, who because of a shortage of cars to the White House yesterday, were left behind, found their names at the top of President Coolidge's visiting list today. The arrangement was made when the 103 patronesses were reported as feeling slighted, and after convention officials had explained that not enough cars had been requested to provide for them.

Meanwhile members of the National Association of colored women, which is represented in the council, announced they were drafting a resolution declaring against "race discrimination." The action echoed the departure in a body of negro visitors from the Tuesday night Musical program when they found the seats intended for them had been occupied by white visitors. As a protest against the seating arrangement, 200 negro singers on the program refused to appear. Resolutions dealing with a number of international topics including the reduction of opium produce, attracted attention of delegates at today's first session.

Stribling Will Fight First Battle Tonight

PREVIEW OF MOVIE FILMS

ACID TEST OF POPULARITY
Hollywood, Cal.—The preview of motion pictures in suburban theatres of Los Angeles has come to be looked on by producers as the acid test of popularity with audiences.

Representatives of the producing company, "laugh and bear" spotters, are scattered through these first-night audiences. The stars, too, frequently attend the previews.

This diagnosis of a picture, producers declare, often sheds strange lights on situation thought at first to be comedy or tragedy. If a so-called dramatic situation fails to bring the desired tension, or, worse yet, elicits laughter, the film is hustled back to the "cutting room" for amputation. "Comedy that fails to produce sufficient mirth is bolstered up."

Kidnaped?

Betty Blythe, film actress, was kidnaped by a troupe of Bedouins who raided her in Palestine while she was acting in a film, according to a report sent around the world by her London press agent. British officials denied the report shortly after it had been sent out. Meanwhile, a friend of Betty's said that she was in this country all the while.

SYNOPSIS
Malone, a young London newspaper reporter, rejected by the girl he loves on the ground that he has no heroic accomplishments to his credit, decides to search for adventure. An appeal to his editor, McArdle, for a particularly dangerous assignment, results in his being sent to interview Professor Challenger, a scientist, who had recently returned from a solitary expedition to South America, with an amazing story of adventure which had been skeptically received by his brother scientists. Challenger, angered, had since refused to talk, and would assault anyone, particularly reporters, who asked questions. He had broken the skull of one reporter sent to interview him.

CHAPTER II—Continued
I entered the club. It was just after eleven, and the big room was fairly full, though the rush had not yet set in. I noticed a tall, thin, angular man seated in an arm-chair by the fire. He turned as I drew my chair up to him. It was the man of all others whom I should have chosen—Tarp Henry, of the staff of Nature, a thin, dry, leathery creature, who was full, to those who knew him, of kindly humanity. I plunged instantly into my subject.

"What do you know of Professor Challenger?"

"Challenger?" He gathered his brows in scientific disapproval. "Challenger was the man who came with some cock-and-bull story from South America."

"What story?"

"Oh, it was rank nonsense about some queer animals he had discovered. I believe he has retracted since. Anyhow, he has suppressed it all. He gave an interview to Reuters, and there was such a howl that he saw it wouldn't do. It was a discreditable business. There were one or two folk who were inclined to take him seriously, but he soon choked them off."

"How?"

"Well, by his insufferable rudeness and impossible behavior. There was poor old Wadley, of the Zoological Institute. Wadley sent a message: 'The President of the Zoological Institute presents his compliments to Professor Challenger, and would take it as a personal favor if he would do them the honor to come to their next meeting. The answer was unprintable.'

"You don't say?"

"Well, a bowdlerized version of it would run: 'Professor Challenger presents his compliments to the President of the Zoological Institute, and would take it as a personal favor if he would go to the devil.'

"Good Lord!"

"Yes, I expect that's what old Wadley said. I remember his wail at the meeting, which began 'In fifty years experience of scientific intercourse—' It quite broke the old man up."

"Anything more about Challenger?"

"Well, I'm a bacteriologist, you know. I live in a nine-hundred-diameter microscope. I can hardly claim to take serious notice of anything that I can see with my naked eye. I'm a frontiersman from the extreme edge of the Knowable, and I feel quite out of place when I leave my study and come into touch with all you great, rough, hulking creatures. I'm too detached to talk scandal, and yet at scientific conversations I have heard something of Challenger, for he is one of those men whom nobody can ignore. He's as clever as they make 'em—a full-charged battery of force and vitality, but a quarrelsome, ill-conditioned faddist, and unscrupulous at that. He had gone the length of faking some photographs over the South American business."

"You say he is a faddist. What is his particular fad?"

"He has a thousand, but the latest is something about Weissmann and Evolution. He had a fearful row about it in Vienna, I believe."

"Can't you tell me the point?"

"Not at the moment, but a translation of the proceedings exist. We have it filed at the office. Would you care to come?"

"It's just what I want. I have to interview the fellow, and I need some lead up to him. It's really awfully good of you to give me a lift. I'll go with you now, if it is not too late."

Half an hour later I was seated in the newspaper office with a huge tome in front of me, which had been opened at the article "Weissmann versus Darwin," with the sub-heading, "Spirited Protest at Vienna. Lively Proceedings." My scientific education having been somewhat neglected, I was unable to follow the whole argument, but it was evident that the English Professor had handled his subject in a very aggressive fashion, and had thoroughly annoyed

his Continental colleagues. "Protests," "Uproar," and "General appeal to the Chairman" were three of the first brackets which caught my eye. Most of the matter might have been written in Chinese for any definite meaning that it conveyed to my brain.

"I wish you could translate it into English for me," I said, pathetically, to my help-mate.

"Well, it is a translation."

"Then I'd better try my luck with the original."

"It is certainly rather deep for a layman."

"If I could only get a single good, meaty sentence which seemed to convey some sort of definite human idea, it would serve my turn. Ah, yes, this one will do. I seem in a vague way almost to understand it. I'll copy it out. This shall be my link with the terrible Professor."

"Nothing else I can do?"

"Well, yes; I propose to write to him. If I could frame the letter here and use your address it would give atmosphere."

"We'll have the fellow round here making a row and breaking the furniture."

"No, no; you'll see the letter—nothing contentious, I assure you."

"Well, that's my chair and desk. You'll find paper there. I'd like to censor it before it goes."

"It took some doing, but I flatter myself that it wasn't such a bad job when it was finished. I read it aloud to the critical bacteriologist with some pride in my handwriting."

"Dear Professor Challenger," it said, "As a humble student of Nature I have always taken the most profound interest in your speculations as to the differences between Darwin and Weissmann. I have recently had occasion to refresh my memory by re-reading—"

"You infernal har! murmured Tarp Henry.

"—by re-reading your masterly address at Vienna. That laud and admirable statement seems to be

AMERICAN WORKERS SPEED UP BECAUSE THEY LOVE SPORTS

Berlin.—Dr. Riechenhahn, professor in the Berlin Technical College, declares no European workmen can compete with American workmen in speed and intensity of labor. Basing his statements on observations made in the United States last year, the professor attributes the superiority of American workers to the American devotion to sports. Even where there is no boss to supervise them, he says, the American workers keep up a stiff pace, and this speed is general throughout America. American sports give men the disposition to "work with delight, buoyancy and rhythm."

Memorial Day Race To Take Place In Charlotte Monday

Charlotte, May 7.—The Memorial Day race here over a distance of 250 miles, in which a field of twenty famous automobile drivers are entered, will have an important bearing on the struggle of America's speed demons for points in the championship contest. The American Automobile Association, which is sanctioning the May 11 event here, telegraphed the Speedway management that Tommy Milton, leading with a total of 660 points, has gained a good lead over the spectacular Peter DePaolo, whose total stands at 560. Harry Hartz is third, with 160; Leon Duray, fourth, 90; Bob McDonough, fifth, 85; Earl Cooper, sixth, 55; Pete Kreis and Benny Hill, tied for 7th, 50 each; Bordino, 35; Lewis, 15; Comer, 15; "Reg" Johnson, ten; Frank Elliott, ten. These drivers, with exception of Comer and Bordino are entered in the classic which will be run on the one and one-quarter mile board oval here next Monday.

Husband Held in Slaying

Frank Kocurek, former army butcher, shown above in inset, was arrested in Chicago, following the finding in his home by detectives (shown above) of a stained knife and hatchet, in their investigation into the supposed murder of a woman whose torso was found on a lonely golf course. Kocurek's wife, Anna, also shown, was missing.

Have Wrought by Cyclone

A terrific cyclone tore through Central Texas leaving destruction in its wake. Photo shows the wreckage of a two-story garage near Dallas, Texas, the upper floor of which housed the hall used by the Odd Fellows and Woodmen.

Cal's Father Examined

Colonel John C. Coolidge, father of the President, at his son's insistence and after a slight ailment, went to Boston, as shown, from his Plymouth, Vt. home, accompanied by Dr. Albert M. Cram, of Bridgewater, Vt., the Colonel's private physician. Dr. Paul D. White and Dr. Arthur L. Chute, consulting specialists, examined him at Massachusetts General Hospital for slight heart and kidney trouble.

GERMAN THEATRICAL MANAGERS AND STARS AT ODDS OVER PAY

Berlin.—Fears are entertained of a German theatrical season next year without any stars. The leading actors have organized solidly in opposition to the managers' agreement not to pay an actor or singer more than 300 gold marks, about \$75, a night. Stage folk who have not arrived regard \$75 big pay for a night's work and are watching the battle from the side lines. Managers insist that the actors have become unreasonable in their salary demands and that the German theatres are on the verge of bankruptcy. The leading actors say the managers are treating them as if they were cattle.

POLKA DOTS FASHIONABLE Again.

London.—Polka dots are the rage again in men's neckwear. Many of the exclusive designs are hand made the dots all being applied by artists on the very finest silk. The smaller the polka dots the more the ties cost.

ONLY POSTOFFICE AFLOAT CLAIMED FOR DETROIT RIVER

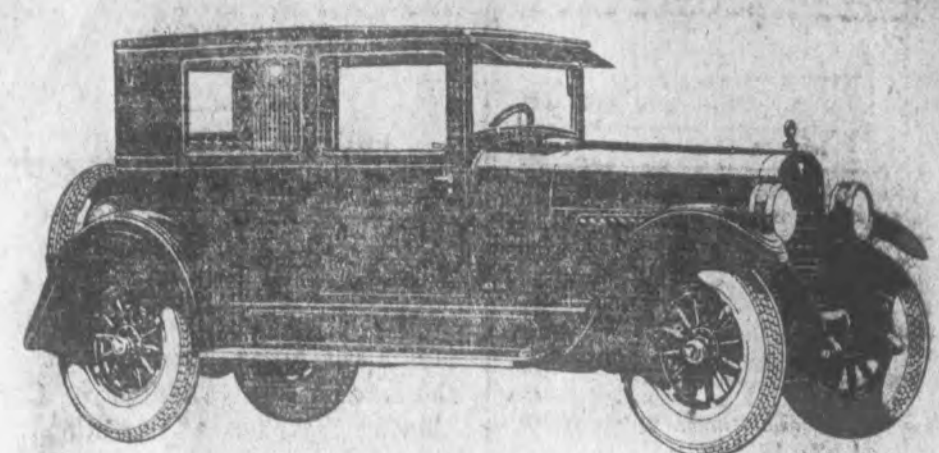

Detroit.—The only floating postoffice in the world, the steamer C. F. Bielman, Jr., again is in service on the Detroit River. Until the last freighter of the season passes through the river here, the small government craft will be in continuous operation, delivering "mail on the fly" 24 hours a day.

Operating as an auxiliary to the Detroit postoffice, the "mail boat" as the Bielman is known, has been in service since 1885. Prior to that time, the crews of lake freighters were obliged to wait until their vessels docked at destinations before receiving mail from home. Sometimes letters were delayed three or four months.

Now letters are addressed aboard a certain steamer, and the Bielman delivers it. A small powerboat is part of the equipment of the mail boat. As the freighter comes up or down the river, this little craft darts out from its berth astern of the Bielman and draws up alongside the passing vessel. A line is tossed to the powerboat, which holds fast until a bag of mail is tossed up and outgoing mail returned. Then the powerboat casts off and returns to the Bielman ready for the next trip.

The entire operation occupies but a few minutes and is accomplished without delaying the freighter. More than 2,000,000 pieces of mail matter to and from the freighter is handled by the mail boat during the navigation season.

It is said that more vessels pass through the Detroit river than any other waterway in the world. During the peak of the navigation season an average of 100 vessels is recorded each 24 hours.

Douglas Fairbanks in his greatest screen classic "The Thief of Bagdad"

Such popularity must be deserved

THE magic carpet of the Thief of Bagdad! The greater magic of Douglas Fairbanks, whose very name packs theatres to the doors! Mr. Fairbanks has won success in many roles, Chesterfield in but

one. Yet both have achieved their immense popularity by the simple process of deserving it. Downright better taste—that's the "magic" of Chesterfield! What else could account for such popularity?

SWORDS AND PLOUGHSHARES

The blast furnace and trip hammer have made a fiction of the old formula of beating swords into ploughshares, but a modern equivalent has been brought to attention by the International Trade Exhibition of New Orleans.

As a depot for the sinews of war the Federal Government erected in New Orleans, among other things, a steel and concrete building costing \$5,000,000 and covering two city blocks. To regard it as a destructive weapon puts a strain upon the imagination but it served that purpose. At least it is to be turned to productive uses.

With the sanction of Congress the building is to be converted into a permanent international exhibition for raw materials and finished products of the United States and such other countries of the world as may choose to use it. It will bring together under one roof the fruits of many climes and of

the industry of many peoples. The Exhibition will be formally opened September 15 of this year. It will be conducted without profit by the business men of New Orleans.

PRUSSIA STILL IN THE SADDLE

Observers who are watching the development of Germany under the Dawes plan keep their eyes on Prussia, for as Prussia goes, so goes the "reich."

"Whatever may be said to the contrary," said Basil Miles, American Commissioner to the International Chamber of Commerce, reviewing the changed conditions in Germany, "and whatever allowance may be made for relative conditions, it is nevertheless a fact that Prussia dominates the German Reich (Commonwealth) just as Prussia dominated the German Empire. It is consequently a matter of serious importance for the future whether Prussia continue to be controlled by Socialists and Liberals, or whether the command of affairs shall now be seized by the Nationalists and Prussian Junkers. Prussia itself was proclaimed a Republic 48 hours before the armistice in 1918—and adopted a republican constitution on November 30, 1920. It is one of the fifteen or more free republics that compose the Republican Commonwealth of Germany today. Apparently the Cabinet is invested with the executive powers of the government and, as in the other States, there is no president. Prussia includes the industrial districts of Prussia, Saxony and Silesia and of the Ruhr and the Rhine Provinces, with their millions of organized labor, who are, for the most part, Socialists. Yet it is in Prussia that the monarchist movement is more effective than elsewhere in Germany, even if not actually more numerous. The development of the situation in Prussia in relation to the rest of Germany must, for the time being, remain one of the important factors in Germany's future."

WOMEN PERSISTENT LOSERS BECAUSE OF PAUCITY OF POCKETS

Los Angeles.—Women are persistent losers; they drop, mislay or walk off and leave purses and parcels with a frequency ten times as great as great as men, says Alfred T. Clothier, custodian of the lost and found department of the Los Angeles street railway and student of the losing habits of mankind.

Nine out of ten lost articles returned to their owners through his department turn out to have been lost by women, Clothier relates. His theory is that women lose more than men because they have fewer pockets, but he admits he has not yet discovered why mothers will let off street cars with their babies and leave baby buggies behind.

Men make more fuss over what they lose, however, than do women, according to records of the lost and found bureau. An outstanding case was the man who lost his false teeth and would not be consoled until he recalled that "if they didn't fit in the finder any better than they did me, they wouldn't do him much good."

Traveling bags and suitcases left on street cars frequently contain puzzling combinations of articles, Clothier said. One recently found, belonging to a woman, contained two dainty silk undergarments, a long, sharp butcher knife and a pear necklace. Another, the property of a man, held a pair of rubber boots with \$1750 in currency stuffed in the toes, a bottle of whiskey and a suit of athletic underwear.

One of the most unpleasant finds reported was a box containing a live rattlesnake, thirteen rattles. It was claimed by an Arizonan who said he had brought it here to be stuffed. Another parcel contained half a man's head. A student of anatomy was taking it home under his arm for further study, but left it on the seat when the conductor called his street.

COURT BALKS WHEN ASKED TO PROHIBIT TWOMAN TALKING

Los Angeles.—Woman's right to talk not only was upheld, but the generally admitted impossibility of restraining her from indulging in speech was legally recognized recently by Judge Walter Gates in Superior Court.

Robert B. Stacy-Judd, a prominent young architect, sought an injunction to restrain his wife from talking about him. After hearing the arguments, Judge Gates remarked that some of the things said had been "indeed a bit catty," but he candidly admitted that he thought no court possessed sufficient power to stop a woman from talking.

ATE TOO FAST

South Carolinian Took Black-Draught For Indigestion, and Says He Could Soon Eat Anything.

Balentine, S. C.—Mr. W. B. Bouknight, of this place, gave the following account of his use of Theford's Black-Draught.

"Just after I married I had indigestion. Working out, I got in the habit of eating fast, for which I soon paid by having a tight, bloated feeling after meals. This made me very uncomfortable. I would feel stupid and drowsy, didn't feel like working. I was told it was indigestion. Some one recommended Black-Draught and I took it after meals. I soon could eat anything any time.

"I use it for colds and biliousness and it will knock out a cold and carry away the bile better and quicker than any liver medicine I have ever found."

Eating too fast, too much, or faulty chewing of your food, often causes discomfort after meals. A pinch of Black-Draught, washed down with a swallow of water, will help to bring prompt relief. Bloating, sensations, eructations, bad breath and other common symptoms of indigestion have disappeared after Black-Draught has been taken for several days.

The Patient Circle of King's Daughters to Conduct 'Block Day'

The Patient Circle of the King's Daughters held an interesting and enthusiastic meeting on Tuesday evening at the home of Mrs. W. H. Dall, with Mrs. Dall and Mrs. N. S. Fulford, hostesses. Over thirty members were received.

Rev. W. S. Harden conducted the devotional services, after which he gave a most interesting talk on "Broadening and Developing Way-fare Work in and Around Greenville." Mr. Harden especially emphasized the need of a community house at the Cotton Mill and also other important features connected with the work among these people. He is vitally interested in the education of the people and stated that in the near future he expects to conduct several what used to be "moonlight schools" in an effort to teach grown people how to read and write. "It is deplorable" said Mr. Harden, "to see the people in this county who are mothers and fathers of large families, unable to read and write." Mr. Harden will appreciate the services of any one who is willing to help in this work. His talk was inspiring and enjoyable.

The various committees made splendid reports. Mrs. Lizzie Griffin, chairman of committee number four, read the tribute of love for Mrs. Claude Grant who was a beloved member of the Patient Circle. Mrs. Grant was ever ready to be of service and she will be greatly missed.

It was decided that on June 10th, the Patient Circle will conduct a "Block Day." A similar event was recently conducted in Norfolk with great results. Several days prior to "Block Day," an advertising campaign will be conducted preparatory to making the event a success. Various members of the Circle will be given "blocks" in the city in which to work and everybody will be given an opportunity to help a most worthy cause. The attention of the public is called to the event, and every one will be well informed concerning same, before June 10.

Other important matters were discussed, several being disposed of while others were tabled until a future date.

At the conclusion of the meeting the hostesses served hot tea and sandwiches.

INFANT DAUGHTER OF MR. AND MRS. J. H. BLOUNT SUFFERS BROKEN LEG

Little Clyde Standell Blount, infant daughter of Mr. and Mrs. Judson Blount is suffering a broken leg which she received when she fell from her crib a few days ago. The little girl recently suffered an attack of scarlet fever, followed by pneumonia, and was convalescing when she received the broken leg. Just how she managed to fall is not known but her knee caught between the railing, breaking one of the small bones. The many friends of Mr. and Mrs. Blount wish for the baby a successful recovery.

Luxury Dealer's Closes Doors

London.—Because the old aristocracy can no longer afford to purchase hand-made lace, and the machine-made product satisfied the new rich, a famous lace-making concern on Bond street has closed its doors. The firm was established in the 18th century, and at one time sold lace cuff ruffles to London dandies.

ADVISES MOTHERS

MRS. GEO. HANEY
"After the arrival of my first child, which nearly cost me my life, I was weak and almost helpless," said Mrs. George Haney who resides at 523 W. Eighth St. Ashland, Ky. "Through the advice of a relative I began to take Dr. Pierce's Favorite Prescription for the purpose of recovering my lost strength and to overcome weakness of the organs affected, and I soon grew strong and well. Since then there have come into our home five children, and each time I took the precaution of taking the 'Favorite Prescription, and I had an entirely different experience from what I had with my first child. 'Favorite Prescription' removes the dread of motherhood, giving strength to the prospective mother."
Go to your neighborhood druggist and obtain Dr. Pierce's Favorite Prescription in tablets or liquid; or send 10c for trial pkg. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., and write for free advice.

COTTON

Ann cotton and Linters available for movement into eighth during balance of this season is 1,215,000 bales compared with 1,206,000 at this time last season, and an average of 2,730,000 in the past four seasons, according to Alston H. Garside, Director of the Cotton statistical service of the Merchants National Bank of Boston. New York. Local cloth markets easier in sympathy with weakness in cotton.

COTTON SUMMARY

London advices say wool sales may be postponed to avert collapse of market. Manchester cables reiterate recent reports that British silk trade as well as Lanashire cotton manufacturers will propose levy on imports of raw silk, rayon and tissues. Manchester cable says investigation of cotton situation in England is gradually recovering, but is handicapped by diminished purchasing power of world's consumers.

Showers occurred yesterday over west gulf states and indications are for showers today in the Mis Valley and tomorrow in East Gulf and South Atlantic states.

Unsettled weather with probable showers is also forecast for much of the southwest.

Of cotton opinions, six bullish, six bearish, two non committal. U. S. Chamber of Commerce organizing drive to prevent increased cotton acreage.

Liverpool cables: Poor undertone, due to beneficial rain over belt, considerable liquidation, probably due to unsettled stock market. Heavy local and American selling on rains in Texas. India spot quotations in Liverpool today unchanged at 1080d.

THE WEATHER

Cool nights continue over entire belt; moderate rainfall in Abilene district.

Forecast: Eastern belt mostly fair; Central and Western belts generally partly cloudy and unsettled with probable showers.

COFFEE

Weakness in Brazilian exchange and lowering of cost and freight offerings materially affecting New York market which is apt to decline further if demand for actuals does not improve.

SUGAR

Futures should again be higher today. Demand for both refined and raws is gaining. As recently suggested about all the bear points possible were discounted in the price, and the accidents favored the long side of the market.

Officials of Cuban Sugar corporation say the 1925 sugar crop now being harvested will be the largest in history.

SUMMARY OF CROP, WEATHER CONDITIONS, IN S. STATES

Crop and weather conditions in the Southern states for the week ending yesterday were summarized today by the Department of Agriculture. Low temperatures and insufficient moisture made unfavorable weather for the germination of late planted cotton in Mississippi, Alabama, Georgia, and South Carolina, and plants are coming up slowly in North Carolina, the report said.

For North Carolina it was stated that weather had been much cooler and there had been some scattered local damage by frost in the Western and Central sections, and by hail in the South East. Beneficial showers took place helping wheat, lettuce, strawberries, and peaches, but too cool for cotton, corn, tobacco and tendered truck. The soil was too dry for wheat, oats, meadows, pastures, and

truck except in the North West where it was very good. Rice seedling was reported as well along.

SALE OF VALUABLE FARM PROPERTY.
